León, Guanajuato · [linkedin.com/in/carlos-martínez-a35595261](https://www.linkedin.com/in/carlos-martínez-a35595261) · +52 477 396 1100 · m_ccg@outlook.com

Full-Stack Developer with nearly 3 years of experience building web and mobile applications. Specialized in TypeScript, React, Angular, and Node.js, with expertise in API design, modular architecture, relational databases, authorization, and automated testing. Advanced use of Codex and other AI assistants to accelerate development, documentation, QA, and technical review, maintaining human control over architecture, security, and quality.

PROFESSIONAL EXPERIENCE

Sistemas Premium · Full-Stack Web Developer · On site · León, Guanajuato · June 2025 – Currently

- **ZÉNIT** - Logistics Management Platform
 - Developing a modular logistics platform with React, TypeScript, Ant Design, Fastify, Prisma, and PostgreSQL within a monorepo.
 - Implementing modules for catalogs, users, roles, shipments, documentary files, notifications, and integrations, applying separation of concerns between domain, API, persistence, and frontend.
 - Developing authentication and authorization schemas based on permissions and resource scope, securing endpoints, routes, and UI actions.
 - Participating in the secure design of migrations, asynchronous processing with Redis/BullMQ, file optimization, and S3-compatible storage.
 - Integrating Codex as an advanced engineering tool through specialized agents, project instructions, and workflows for implementation, documentation, migration review, security, QA, and E2E testing.
- **Driveka** - Automotive Platform & CRM
 - Developed a web platform with Next.js, TypeScript, Express, and SQL Server, including payments, advanced vehicle search, and user profiles.
 - Designed a backend based on hexagonal architecture, dependency injection, and design patterns to keep the domain decoupled and facilitate testing.
 - Built a CRM with React, Material UI, and Zustand to manage users, sales, inventory, and access control.

Castores · Full-Stack Web Developer · Hybrid · León, Guanajuato · July 2024 – June 2025

- Developed Human Resources modules for loans, FONACOT, vacation premiums, and payroll-related processes.
- Built interfaces with Angular, TypeScript, and Angular Material, including data grids for querying and managing large volumes of information.
- Implemented APIs with Node.js, Express, and MySQL, applying MVC, DAO, DTOs, data validation, and optimized SQL queries.
- Automated the generation and processing of XLSX, CSV, and PDF files, along with email notifications.

Visitapp · Full-Stack Web Developer · Hybrid · León, Guanajuato · Oct 2023 – July 2024

- Developed web and mobile solutions with React, React Native, and TypeScript for visitor management and corporate housing rentals.
- Built multi-tenant services with Elixir, Phoenix, Ecto, and PostgreSQL, oriented towards concurrent data processing.
- Integrated facial verification using Python and Amazon Rekognition, utilizing AWS S3 and EC2 for storage and deployment.

- Implemented GraphQL API consumption with Apollo Client, camera capture, and metrics visualization with ApexCharts.

EDUCATION

UVEG (Virtual University of the State of Guanajuato)

Bachelor of Science in Computer Systems Engineering · GPA 94/100 · January 2026

SKILLS

- **Frontend:** React, React Native, Angular, Next.js, TypeScript, JavaScript, Vite, Ant Design, Material UI, Zustand.
- **Backend:** Node.js, Fastify, Express, NestJS, Elixir, Phoenix, REST APIs, GraphQL, asynchronous processing.
- **Data:** PostgreSQL, MySQL, SQL Server, Prisma, Ecto, relational modeling, and query optimization.
- **Architecture & Quality:** Hexagonal architecture, modular design, design patterns, Zod, Vitest, Playwright, unit and E2E testing.
- **Infrastructure:** Docker, AWS S3, EC2, Redis, BullMQ, object storage, and Git.
- **AI-Assisted Dev:** Advanced use of Codex for implementation, code analysis, specialized agents, QA automation, technical documentation, migration review, and security audits. Complementary experience with other AI assistants.
- **Additional Knowledge:** Python, Java, Spring Boot, PHP, MongoDB, and C#.
